SUMMARY TABLE READ WITH ZOOM !

[Part of publication `METAPSYCHOLOGY and PSYCHOLOGY, METAPSYCHIATRY and PSYCHIATRY, METAPSYCHOTHERAPY and PSYCHOTHERAPY.
A new theory on psyche, mental disorders and their psychotherapy - in particular, schizophrenia.´] published in http://new-psychiatry.com
The links connect directly to corresponding sections of this publication. (2022-04-01).

Overall, the table shows a new classification of the psyche and from left to right the possibilities of the emergence of mental illness, especially schizophrenia.

The ***leftmost vertical column*** shows the classification of psychical Relevant in Dimensions and Differentiations.

The **Differentiations** include everything psychically relevant at different levels. I have derived them from general language patterns, as I described in detail in the chapter 'Metapsychology'.

The **Dimensions** represent fundamental meanings (a1-7) to each psychically relevant element. The bold-signed terms of cell Aa1: absolute (A) relative (R) and nothing (0) are keywords for all dimensions.

The ***horizontal rows*** show - from the left to the right - the development of psychical symptoms or disorders up to the schizophrenia.

The column **A** includes Metapsychology, B to D Psychology, columns **E** to **N** Metapsychiatry and columns **O** to **V** Psychiatry especially **T**-**V** Schizophrenia.

`The neutral psychic Relevant' one finds on the top horizontal row leftmost. Here I listed general and personal `neutral´ forms, functions and actions in columns **A** to **D** in all aspects.

This corresponds essentially to the classification of the parts `Metapsychology´ (column **A**) and `Psychology' (**B** to **D**) in the above named publication.

I called the next bigger segment (columns **E** to **K**) `Emergence and character of the It´. I understand the term It as a new strange complex entity, created by `inversions´, which dominates psychic relevant (pr) systems, especially human. With Inversion I denote a confusion of fundamental meanings. As fundamental meanings, I suppose the above-mentioned dimensions.

I.e., if absolute, relative or 0 resp. other fundamental meanings are confused, I speak of inversion. The confusion of such fundamental meanings is ubiquitous. Typical examples are ideologies.

These, as well as similar dogmatic attitudes in families or in the individual, occur with an absoluteness claim that absolutizes something Relative and at the same time negates and excludes others.

This leads to fundamental reversals of meanings. The column **J** should show with the symbol ↕, that the Its make strange Inverted Realities and Inverted Personal too.

The Its have another effect on the person in the long term than at the short term. In the column **K** the unfavorable long-term character of the It is shown and his possible impacts in general from **L** to **N** and from **O** to **S** the impacts on a person. Finally, all possible symptoms of Schizophrenia are listed exemplarily from column **T** to **V**.

A process is important to understand the genesis of the disorders, which I called `Spreading and Compression´and described closer in `Metapsychiatry´ - I.e. every inversion spreads in such a way, that it can cause all sorts of disturbances, as well as one disturbance can be caused by all sorts of inversions. Here I distinguish obligatory and optional effects ("main and secondary impact-directions" of the inversions). For example: One inversion in the dimension´s aspect a4, caused by corresponding ideologies (e.g. in cell Ea4) causes obligatorily disturbances in this a4 aspect, but all other disturbances can be caused optionally. But, on the other hand, one disturbance is able to be caused also by all other inversions (see column F).

Bleuler) disturbed realization verification falsification transformation	Va3 unsubstantial wrong, unreal hyperreal e.g. thinking, behavior, feeling, percipience etc.
DIMENSIONS	a4	Oa4 split* disintegrate collapse crash merge implode / explode	Pa4 split isolate anticathexis sideness, introjection* reaction formation*	Qa4 ambivalent conflicting contradictory unilateral partial mono unbound	Sa4 disorder of pers. unity integration synthesis generalization division exclusion (schizo psychoses autism dissociative disorders)	Ta4 dfh unity whole parts, diversity	Ua4 disturbed (dfh) integration differentiation selection concentration fusion/ splitting anticathexis ↕whole / parts	Va4 unilaterally „Concretism“ (C.G: Jung) autistic fusioned,/ ambivalent, contrary divided split fragmented e.g. thinking, behavior, feeling, percipience etc.
DIMENSIONS	a5	Oa5 fall sway reel solidify stick compulsive act	Pa5 let go fix urge determine	Qa5 unsure random f.programmed too certainly too safe too necessary	Sa5 disorder of the safety conditionalization / debonding (e.g. compulsive disorder)	Ta5 dfh security stability certainty freedom	Ua5 disturbed (dfh) conditionalization stabilization security ↕ necessary / unnecessary	Va5 vaguely random / f.programmed rigid stiffly determined fixed e.g. thinking, behavior, feeling, percipience etc
DIMENSIONS	a6	Oa6 set fall decline go under /take off overreact revolve	Pa6 false base equalize - radicalize understate exaggerate	Qa6 groundless too direct / f.based inadequate crazy eccentrical extreme too ex hyper, hypo	Sa6 disorder of pers. priority and its functions: hierarchization centralizing subordination causing ("hysteria")	Ta6 dfh primary centre middle overview etc. /periphery edge	Ua6 disturbed (dfh) hierarchization centering foundation causing over- and subordination „causal thinking“ (G. Benedetti) ↕ primary / secondary; causes / /consequences	Va6 strange priorities, hierarchies, over-subordinations; radical extrem decentralized eccentrical too superficial unfounded e.g. thinking, behavior, feeling, percipience etc
DIMENSIONS	a7	Oa7 lose isolate itself	Pa7 obey overadapt subdue f.autonomize	Qa7 dependent strangely-determined/ too automatically too autonomous too uninfluenceable	Sa7 disorder of independence and autonomy emancipation liberalization / bonds, heteronomization	Ta7 dfh autonomy independency self-determination	Ua7 disturbed (dfh) autonomization emancipation adaptation ↕ dependence / autonomy	Va7 nf heteronym dependent too autonomous uninfluenceable behavior, feeling, thinking, percipience (Echolalia, Echopraxia, / Negativism)
DIFFERENTIATIONS – MAIN DIFFERENTIATIONS	I	OI atrophy expire degenerate deform itself	PI f.exist ideologize false structure	QI dissolved amorphous false-structured too materialized, somatized	SI disorder of pers. being and functions, concretization / phantomising, demonization destructuration (e.g. psychosomatic diseases see below)	TI disturbed (dfh) being, person, world, things, ideas →lotro worlds	UI more disturbed (dfh) nominal relation, structuralization concretization/ abstraction ↕ things / ideas	VI non-being, destroyed, missing etc./ defect or foreign-being e.g. in behavior, feeling, thinking, perception etc.
DIFFERENTIATIONS – MAIN DIFFERENTIATIONS	II	OII die, vegetate /pseudo-live malfunctioning.	PII disturbed (dfh) live, only function instead live, kill, handle wrong with live and death	QII unlived deadly / false-vividly too functional mechanistic, robot-like	SII disorder of the life and his functions: defect "verbalizations", functioning, too unconsciously live and experience	TII the life is disturbed (dfh)	UII disturbed (dfh) live, experience and functioning ↕ life / functioning	VII unliveliness wrong alive alive ↕ lifeless
DIFFERENTIATIONS – MAIN DIFFERENTIATIONS	III	OIII flatten, ~ functioning experience off disturbed qualities	PIII f. qualify e.g. whitewash/ negate	QIII too deficient too negate / too positive faultily ∑ disturbed	SIII Disorder of pers. features and functions (defect "adjectivations", negation, affirmation, assessment see below)	TIII. qualities are disturbed (dfh)	UIII disturbed (dfh) qualification, negation, affirmation, assessment, attribution ↕ first / second rank qualities	VIII disturbed (dfh) qualities: too negative/ too positive ambivalent (all the other qualities, too) in P, in behavior (e.g. negativism), feeling, thinking, perception …
DIFFERENTIATIONS – MAIN DIFFERENTIATIONS	IV	OIV P lives as object functions for the It de/ f. equilibrate f. associate	PIV objects absolutize / subjects negate; something out of the context tear, decontextualize	QIV too passive f. functionalized, too incoherent, wrong linked	SIV disorder of subj. /obj. and connections, f "syntactizing", f. equilibrating, contextualizing, con-/ disjunction, chain reaction	TIV no, false subjects, objects their connections., also role, e.g. as puppet	UIV ~ (dfh) subject-/object relations; disturbed contextualization, con-, disjunction, recourse, systematization, ↕subjects/ objects; ↕ connections	VIV disturbed (dfh) subjective, object-like, e.g. subjektoid, objektoid, disconnected thinking, behavior …
DIFFERENTIATIONS – UNITS	1	O1 disappear isolate blow up, inflate	P1 repress* negate isolate /totalize generalize; everything act resp. sA	Q1 too total, all or nothing, too alone, too completely too much /not enough too, hypo-, un-/hyper-, poly-	S1 disorder of all and nothing and their relations as deletions, abstracting generalizations	T1 all, one, something are disturbed (dfh) e.g. one-man's world	U1 disturbed (dfh) deletion, abstraction, generalization / induction, deduction empty- or displacement activity ↕ all and some and 0 etc.	V1 nf complete, too much, too… / trifling, deficits, **all or nothing**, e.g. in behavior feeling thinking perception etc. e.g. missing overtones
DIFFERENTIATIONS – UNITS	2	O2 despair give up	P2 f. believe demonize idolize sacrifice	Q2 unloving / too nicely arrogant	S2 disturbance of God's and world-view and relation with It.	T2 disturbed God's picture disturbed world view	U2 disturbed (dfh) transcendent and immanent relation like faith love, e.g. superstition ↕ transcendent / earthly	V2 lovelessness / too much "love", sacrifice in behavior, feeling, thinking, perception etc.
DIFFERENTIATIONS – UNITS	3	O3 lose personality function as a thing machine etc.	P3 role play too related to ones	Q3 impersonal more mechanical thing-like	S3 disturbance of relations to things objects, to the world, to people	T3 disturbed (dfh) personality	U3 disturbed (dfh) environmental relation: disintegrated encodes (E. Redlich) / petrification ↕person / things	V3 wood-like, too concretized, too reified / hyperpersonal in behavior, feeling, thinking, perception …
DIFFERENTIATIONS – UNITS	4	O4 encase isolate / false identify f. communicate	P4 imitate overadapt false love clinch, bite	Q4 standardly egocentrical anomalous atypical/ aggressive / servile	S4 disturbance of empathy, social behavior, resonance (social phobias, autism, disorders of communication, ego-functions, psychoses).	T4 disturbed (dfh) meaning of I and others	U4 disturbed (dfh) self-and social relation and communication, individualization ↕ from I / Other / ↕ from inside / outside	V4 Ego-like, I-disturbed e.g. autism (prime symptom E. Bleuler) narcissism, autoaggressive / abnormal anomalous in behavior, thinking, perception …
DIFFERENTIATIONS – UNITS	5	O5 fall ill, somatize false functioning, conversion*	P5 live unhealthily	Q5 too pointless pathological egocentrical introversive too I-foreign	S5 disturbance of self-reference and disorder of body and organ functions, somatization, inheritance (above all psychosomatic. disorders)	T5 disturbed (dfh) body, organs	U5 disturbed self-reference, disturbed body- /organ-functions, somatizing, inheritance ↕ body /soul /spirit	V5 despiritualized, soulless, disembodied nf spiritualized soul, ghostly, supernatural in P, e.g. in behavior, feeling, thinking, perception etc.
DIFFERENTIATIONS – UNITS	6	O6 a-/false sexualize, neutralize, effeminate, masculinize	P6 "castrate" / gender, sex demonize idealize sex pervert	Q6 neutral sterile too manly, female	S6 disturbance of gender and sexuality sex relations (sexual disturbances, e.g. sadism, masochism	T6 disturbed (dfh) gender	U6 disturbed (dfh) sexual function ↕ from gender, from love / sex	V6 too neutrally, sexualized, sex. perverted in the behavior, thinking….of P
DIFFERENTIATIONS – MODALITIES and DYNAMICS	7	O7 no feel / suffer f. feeling, frighten despair feel too + or too –	P7 nothing enjoy disturb spare satisfy romanticize	Q7 dull unemotional vague fearful painful desperate ambivalent ecstatical	S7 disturbance of pers. states, feelings, sensation, compassion (emotional disorders: fear, pain, illnesses, MDE)	T7 disturbed (dfh) states feelings	U7 disturbed (dfh) sensory, feelings e.g. parathymia; e.g. feeling to play a role (Jaspers) ↕ of the feelings	V7 bluntness, "cold", wooden; of fear, restlessness, sad being accompanied existence "expressed emotions" hypersensitivism
DIFFERENTIATIONS – MODALITIES and DYNAMICS	8	O8 let oneself go; give up get carried away; run after addict	P8 nothing want, break will f. want under-/ overstimulate	Q8 too involuntary unconscious reflex-like too passive, aimless	S8 disturbance of impulse, drives, motivation, automation, (e.g. abulia under-/ overexcitation, addiction)	T8 disturbed (dfh) will, desire, drive	U8 disturbed (dfh) impulse, drives (main symptom) abulia, hypobulia, ambivalent wish	V8 involuntary, passive, denial or "made" of thought insertion (=1st rank symptom) "obsession" automatisms/ lack of self-control arbitrary in behavior feeling thinking, perception
DIFFERENTIATIONS – MODALITIES and DYNAMICS	9	O9 lose oneself , bleed/ lug, grow fat, too heavy take	P9 sacrifice itself f. have, overspend / steal	Q9 too blank faultily fragmentary / too hard, grave	S9 input/ output disturbance (above all eating disorders, also stomach-intestinal disturbances, asthma)	T9 disturbed (dfh) posession	U9 disturbed (dfh) input/ output ↕ input/ output	V9 hollowness, poverty, degeneration, e.g. personality defects, loss of affektivity (Schulte-Tölle), occupiedness
DIFFERENTIATIONS – MODALITIES and DYNAMICS	10	O10 surrender fail unlearn forget / faulty function	P10 do not learn/ faulty condition train; with the head against the wall	Q10 too weak exhaustible / too paved reflective also: too strong	S10 disturbance of abilities, opportunities and its functions. as learning, conditioning (eg impotence, psych. weaknesses, f. conditioned)	T10 disturbed (dfh) abilities, opportunities	U10 disturbed (dfh) learning and conditioning e.g. to communicate etc	V10 weakness, impossibilities e.g. to feel, to the "exceeding"/ false abilities and potencies
DIFFERENTIATIONS – MODALITIES and DYNAMICS	11	O11 disintegrate dissolve / melt merge / compulsive act, perseverate must go	P11 do not order / force, demand, urge	Q11 random lawless messily / rigid, firm determined urgently	S11 disturbance of psychic orders and laws like integration, organization, systematization (e.g. confusion compulsions)	T11 disturbed (dfh) orders laws	U11 disturbed (dfh) organizing, arranging, integrating/ dissolving, resolving	V11 Incoherence of thoughts (E. Bleuler), dissociations, vague, e.g. absent-minded thinking, "word salad" - imperatives! ritualized
DIFFERENTIATIONS – MODALITIES and DYNAMICS	12	O12 drift stagger reel sway circulating , turn miss digress,	P12 do not orient / moralize discipline train regulate	Q12 too unsteered inflexibly undirected/ misdirected wildly	S12 disturbance of conscience, superego orientation, steering	T12 disturbed (dfh) superego	U12 disturbed (dfh) of orientation. steering Pat. can´t orient himself (Bleuler)	V12 divergences, e.g. "intrapsychic ataxia" (Stranski) / single-track in P, e.g. in behavior, feeling, thinking, perception etc.
DIFFERENTIATIONS – MODALITIES and DYNAMICS	13	O13 release, get stuck suffocate choke itself	P13 too much permit /prohibit disenfranchise suppress „ get a grip“	Q13 uncontrolled, too excessive / limitedly restrictedly not free, too braked	S13 disturbance of regulation, control, inhibition (e.g. stupor hyperarousal, rheumatism, Parkinson, epilepsy, asthma)	T13 disturbed (dfh) rights	U13 missing and false controlling / binding	V13 constrictions, unfreedoms, restrictions / uncontrolled, overshooting, e.g. movement storm, logorrhoea
DIFFERENTIATIONS – MODALITIES and DYNAMICS	14	O14 silt up flatten dry up / faulty create hallucinate foreign-new experience	P14 do not dream,-false produce, imagine fancy, fantasize/ only after the reality direct	Q14 too sterile monotonous /strange, abstruse weird, awfull, crazy	S14 disturbance of creativity formation, "ground", reality relation (above all mania, hallucinations)	T14 disturbed (dfh) new shared	U14 lack of creativity / "grounding" false creativity: above all there hallucinating delusion f.inspirations	V14 trivial level, sterile, stereotypes (motor activity, speech)/ artificial abstruse bizarreness e.g. neologism, hallucinations, (delusion) mannerism
DIFFERENTIATIONS – MODALITIES and DYNAMICS	15	O15 lame limp do not move cramp rotate, tremble tense	P15 nothing act / wrong act, e.g. power torment kill sublimate*	Q15 idly cramped lame ineffective laborious / overexcited	S15 disturbance of motility, activity, behavior movement strain, relaxation (e.g. death struggle passiveness, psych. paralyses agitation epilepsy)	T15 disturbed (dfh) done results	U15 disturbed (dfh) movements, actions, e.g. absurd, inadequate actions. Catatonia, stupor. activity ↕ passiveness	V15 immobile, lame, made, tense, stiff, tense in P, e.g. in behavior, feeling, thinking, perception etc.
DIFFERENTIATIONS – MODALITIES and DYNAMICS	16	O16 nothing/ f percieve go blind disown* misjudge misunderstand f. interpret	P16 do not inform fade out / lie hide rationalize* intellectualize	Q16 unclear irrational illogical un-/conscious incomprehensible	S16 disturbance of reception-systems, consciously / unconsciously -becoming (e.g. delusional percept hallucinations delirium, Alzheimer	T16 disturbed (dfh) Information consciousness	U16 disturbed (dfh) perception, data processing, (think, see Asp.18) "double accountancy" illusions information ↕misinformation	V16 incomprehensible, too unconscious, contradictory absurd, e.g. absurd activities, speech overconsciousness.
DIFFERENTIATIONS – MODALITIES and DYNAMICS	17	O17 go silent / false appear f.move f.action, f.project fantasize	P17 edge out repress hide, deceive, delude	Q17 inexpressive unclear/ coded symbolically mysteriously also unconsciously	S17 disturbance of expression reproduction, representation, symbolizing, signaling, de-/coding externalisation, projections (like linguistic disturbances)	T17 disturbed (dfh) expression reproduction	U17 disturbed (dfh) expression above all speech eg paraphasia ("word salad") schizophasia verbigeration echolalia. the reality false reflect	V17 concealed, too unconscious unclear; -Symbolism facades, e.g. symbolic, coded language, thinking, paramimia, paraphasia
DIFFERENTIATIONS – MODALITIES and DYNAMICS	18	O18 lack/ f.assess misunderstand f.interpret , also think: misjudge, deteriorate	P18 depreciate ignore / overrate blow up	Q18 banal illogical / ambiguous inadequate false-valued	S18 disturbance of value systems and functions: JUDGMENT and THINK, meanings selection abstracting, generalizing, transferring. (e.g. mania)	T18 disturbed (dfh) value meanings above all selfvalue	U18 disturbed (dfh) judge, thinking (basic symptom Bleuler) illogical thinking (Paralogie) Delusion ↕ Important / different meanings	V18 too insignificant, unimportant false meanings, hypermeanings in the thinking, behavior, experience
DIFFERENTIATIONS – MODALITIES and DYNAMICS	19	O19 regress* / senile, also: ossify	P19 dwell on past, f.refer back flee escape, reenact	Q19 archaical anachronistical also:too unconscious chronically deadlocked	S19 disturbance of past and resp. functions: DEVELOPMENT recollection repetition experience forgotten (e.g.regressions, amnesia)	T19 disturbed (dfh) past	U19 development is faultily and faultily remind, regressions ↕ of different times	V19 archaic atavisms, e.g. archaic thinking, archaic behavior, Ego-anachoresis / false habits
DIFFERENTIATIONS – MODALITIES and DYNAMICS	20	O20 creep along crawl:rush / back and forth race,	P20 time wasting, put off, hold out, shift / rush press	Q20 delayed never again too slowly too late endlessly / too quickly briefly discontinuous	S20 disturbance of. present and its functions: TIME, EXPERIENCE, present relation, slowing acceleration	T20 disturbed (dfh) present	U20 disturbed (dfh) time experience, e.g. of the time shutdown, merge of the time, time breakdown (Jaspers) ↕ times	V20 delays, "blockage" no/ too long postduration, e.g. of the affects, subj. feeling, e.g. flow of thought is tough/ high-speed
DIFFERENTIATIONS – MODALITIES and DYNAMICS	21	O21 despair resign false imagine f.antizipate	P21 do not plan nothing hope / the wrong expect	Q21 aimlessly unpredictable undirected f.-preprogrammed	S21 disturbance of pers. future and its functions: FUTURE, RELATION, anticipation, adjustment on…	T21 disturbed (dfh) future	U21 disturbed (dfh) future relation ↕ from different future	V21 disconnected, unpredictable e.g. unpredictable reactions (Benedetti, Redlich)
DIFFERENTIATIONS – QUALITIES	22	O22 further missing feel ashamed	P22 fail correct, condemn sublimate*, fail- overcompensate countertake see above justify	Q22 faulty incorrected unbalanced hyper-, false-reactive	S22 disturbance of CORRECTION and rep. functions:, feed back,revision restoration, check, deletion (depression etc)	T22 disturbed (dfh) error/ lack of error	U22 disturbed (dfh) correction regularisation ↕ from guilt / innocence	V22 uncorrected unsolved, e.g. uncorrectable wrong thinking, convictions (see also delusion) Faulty in all functions of the psyche possibly
DIFFERENTIATIONS – QUALITIES	23	O23 give up surrender, decompensate/ fail fend displace repress	P23 not or f.protect, uncover, bare itself/ suffer cry grief / threaten armor-plate	Q23 too passive irritable defect hyperreactive uninfluenceable	S23 disturbance of DEFENSE, defensive systems/ functions: defense, reaction, protective (e.g. with allergies, immune weaknesses	T23 disturbed (dfh) protection, defense	U23 disturbed (dfh) defense, vulnerability (G. Benedetti, Jaspers) defense often based on symptoms. resistance ↕ from first / second-rate protection	V23 raised vulnerability, (subj.: feeling of the overwhelming, also of the "made" see above); Pat. feels threatened
